

## View. Store. Share.

SanDisk, the world's #1 supplier of flash data storage for today's most popular consumer electronics devices, now makes it easy and affordable to view, store and share your digital photos, music and video clips on TV. You can even play your MP3 files on an audio system without a TV. Just like CDs on a CD player.

### Minimum System Requirements:

- Television or Projector
- Video (RCA) Input
- Audio (RCA) Input

# SanDisk® Photo Album

*View your digital photos and play video clips and music on your TV and audio system!*

SanDisk Photo Album is the way to share your life's moments with your family and friends.

## SanDisk Photo Album

The SanDisk Photo Album now makes it simple, convenient and affordable to view, store and share your favorite digital photos, video clips and music on your TV. No computer is required! Family and friends no longer have to crowd around a computer or your camera's tiny LCD screen to view photos.

### View

Instantly view your images as thumbnails or full screen by inserting the memory card from your digital camera into the SanDisk Photo Album. Use the remote control to select transition effects, to rotate and zoom in/out on a photo, to expand the video to fit the entire screen and more.

### Store

Simply press the Store button on your favorite images and the SanDisk Photo Album instantly creates a photo album. On the back is a slot for a second CompactFlash® card (not included), which is used as the "memory" for storing slide shows, video clips and MP3 music selections. The storage format for photos is optimized for television viewing. While the visual quality is similar to the original, higher-resolution version, the file size that is saved is much smaller. Therefore it is possible for a 256-megabyte CF card, for example, to hold up to 4,000 photos\*. By connecting the SanDisk Photo Album to a computer, it functions as an 8-in-1 card reader/writer. Now you can drop MP3 music files onto the same card that stores the images for TV playback and thus have background music for slide shows.

### Share

Sit back with your family and friends and share years of memories in the comfort of your living room.

### So much functionality in a sleek, compact viewer

- **Convenient**—The best way to view and share digital photos, video clips and music on a TV and audio system in the comfort of your living room.
- **Store up to 4,000 digital photos\***—Browse through years of memories—vacations, get-togethers with family or friends, even sports—without the need to pull out bulky scrapbooks, shoeboxes full of prints or fragile CD-ROMs.
- **Easy-to-Use**—The setup is so easy—anyone in your family can do it. To use, simply remove the memory card from your digital camera and insert it into your SanDisk Photo Album.
- **Photos, Videos and Music**—The most common file formats used by digital cameras including JPEG (up to 16 Megapixel), Motion JPEG, MPEG-1 and MP3.
- **Full-Featured Remote Control**—The remote lets you customize your slide show and view your images in multiple ways. Play/pause, next/previous,

store/delete, rotate, zoom in/out, select between Photo/Video and Music menu and more from anywhere in the room.

- **Customize your slide show**—Select a transition effect, slide interval time, random or sequential playback, playback with or without music and more.
- **Multi-Card Compatibility**—The most popular memory card formats are supported, including CompactFlash Type I and II, SmartMedia™/xD, Memory Stick™/Memory StickPRO™, SD™, and MultiMediaCard™ memory cards. You can also connect and play from a USB Flash Drive.
- **Small, Compact and lightweight**—A sleek look that's just the right size, small enough to take with you anywhere there is a TV.
- **Displays Multiple Languages**—On screen text in English, French, Spanish, German, Italian, Chinese and Japanese.
- **Switches between NTSC and PAL TV Format**—It works with both types of TV standards—anywhere in the world.
- **8-in-1 USB Card Reader/Writer**—Connect the SanDisk Photo Album to a PC and use it as an 8-in-1 USB Card Reader/Writer (compatible with Windows 98SE, ME, 2000, XP and Mac OS 10.1.2+)

\*Based on average of 60KB per digital photo in TV (VGA) resolution stored on 256MB CompactFlash card. More photos can be accommodated with higher-capacity CF cards (card not included).
